Sub-PRD 3 — Client Admin — Content Assignment & Learning Paths

> ⚠️ **V1 SCOPE LOCKED — March 20, 2026**
> **Learning Paths: V2 — ENTIRELY DEFERRED.** No learning_paths, steps, enrollments, or step_progress tables in V1.
> **V1 scope = Content Assignment (Dept/Team/Individual, dynamic) + Individual Course Completion Certificate only.**
> Certificate for assessment pass: V2. Certificate for learning path completion: V2.

Document Type: PRD — Detailed Feature Spec with Acceptance Criteria

Parent Document: Client Admin Master PRD

Author: Sandesh Banakar I

Status: PARTIAL IN SCOPE — Content Assignment V1 only. Learning Paths V2.

Version: 3.1 — Updated March 23, 2026

V1 / V2 Split

Feature	V1	V2
Content Assignment (Dept / Team / Individual)	✅	
Dynamic membership (future learners inherit access)	✅	
Groups as assignment target		✅
Learning Paths (all of it)		✅
Sequential unlock engine		✅
Individual course completion certificate	✅	

Assessment completion certificate		✅
Learning path completion certificate		✅
Learner-facing certificate download		✅
Path deadline + overdue flags		✅

---

1. Problem This PRD Solves (V1)

A tenant's learners and org structure exist. The platform must answer: **"What does each learner have access to?"**

V1 solves content access — making content items available to a target group of learners. No sequence, no unlock gates. Assign → learner can access.

V2 solves structured progression — learning paths with sequential steps, pass thresholds, and certificates per path.

---

2. Locked Decisions (V1)

Decision	Value
Assignment model	Dynamic — current + future learners in a target auto-get access
Assignment targets	DEPARTMENT, TEAM, INDIVIDUAL (3 types in V1)
Groups as target	V2
Learning Paths	V2 — entirely deferred
Certificate trigger (V1)	Course completion (100% screens viewed) only
Certificate trigger (V2)	Assessment pass + learning path completion
Learner-facing certificate download	V2

Content creation in CA	FULL_CREATOR tenants only — from tenant's own Content Creators
Global Catalog nav label	"Global Catalog" (renamed from "Catalog", March 23, 2026)
Source badge — keySkillset content	"keySkillset Content" (renamed from "Platform Content", March 23, 2026)
Source badge — tenant content	"Your Organisation" (unchanged)

---

3. Scope Boundaries (V1)

In Scope

- Global Catalog browse (global content from assigned B2B plans + FULL_CREATOR own LIVE content)
- Content assignment to Department / Team / Individual
- Dynamic membership resolution (future learners inherit)
- Content unassignment
- Individual course completion certificate (issued when 100% screens viewed)
- CA views certificates in R6 report
- All audit log events

Out of Scope V2

- Groups as assignment target
- Learning Paths (CRUD, steps, enrollment, unlock engine, deadlines)
- Assessment completion certificates
- Learning path completion certificates
- Learner-facing certificate download
- Content preview before assigning
- Scheduled content availability

---

4. Data Model (V1)

ContentAssignment

Field	Type	Notes

id	uuid	PK
tenant_id	uuid	FK → tenants
content_id	uuid	FK → content_items.id or courses.id
content_type	text	ASSESSMENT | COURSE
target_type	text	DEPARTMENT | TEAM | INDIVIDUAL
target_id	uuid	FK to dept / team / learner
assigned_by	uuid	FK → admin_users
assigned_at	timestamptz	
removed_at	timestamptz	NULL = active

LearnerContentAccess

Field	Type	Notes
id	uuid	PK
learner_id	uuid	FK → learners
content_id	uuid	
content_type	text	ASSESSMENT | COURSE
tenant_id	uuid	
source_assignment_id	uuid	FK → content_assignments (traceability)
granted_at	timestamptz	
revoked_at	timestamptz	NULL = active

Certificate

Field	Type	Notes
id	uuid	PK

learner_id	uuid	FK → learners
content_id	uuid	FK → courses.id (V1: courses only)
content_type	text	'COURSE' only in V1
tenant_id	uuid	
learner_name	text	Denormalised
content_title	text	Denormalised
tenant_name	text	Denormalised
certificate_number	text	UNIQUE — KSS-{tenant_short}-{YYYYMMDD}-{seq}
issued_at	timestamptz	

---

5. Content Assignment — Full Feature Spec (V1)

5.1 Global Catalog Browse

Entry: Global Catalog (sidebar)

FULL_CREATOR tenant CA sees:

- All GLOBAL LIVE content from B2B plans assigned to this tenant (B2B_ONLY or BOTH, via tenant_plan_map → plans → plan_content_map → content_items/courses)
- All TENANT_PRIVATE LIVE content owned by this tenant (content_items WHERE tenant_scope_id = :tenant AND visibility_scope = 'TENANT_PRIVATE')

RUN_ONLY tenant CA sees:

- Only GLOBAL LIVE content from B2B plans assigned to this tenant

Source attribution badges (locked March 23, 2026):

- **"keySkillset Content"** badge (zinc) — shown on EVERY GLOBAL row, always visible regardless of whether tenant has TENANT_PRIVATE items. Makes the content origin unambiguous at all times.
- **"Your Organisation"** badge (amber) — shown on TENANT_PRIVATE items (FULL_CREATOR tenants only)

Badge legend (inline, above table):

> keySkillset Content — added by keySkillset
>
> Your Organisation — added by your organisation's content creators

Search + Filter:

- Search by title
- Filter by type: All / Assessment / Course

5.2 Assignment Flow

Trigger: Global Catalog → item → "Assign" button OR Learner profile → "Assign Content"

Assignment modal:

- Target Type: Department / Team / Individual
- Target: search + select (filtered by type)

On save:

1. ContentAssignment record created
2. Dynamic resolution: all current members of target get LearnerContentAccess records
3. Audit: CONTENT_ASSIGNED

Dynamic resolution logic:

```
ON assignment creation:
  FOR each active learner in target:
    IF no active LearnerContentAccess exists for (learner, content):
      CREATE LearnerContentAccess record

ON learner added to target (Dept/Team):
  FOR each active ContentAssignment on that target:
    IF no active LearnerContentAccess exists for (learner, content):
      CREATE LearnerContentAccess record

ON learner removed from target (or target archived):
  LearnerContentAccess records for that learner/target:
    SET revoked_at = NOW()
    (unless covered by another overlapping assignment)
```

5.3 Acceptance Criteria

AC-3.1.1 — Assign to Department; future learner inherits access

```
Given content "NEET Biology Mock Test 1" is assigned to Department "NEET Batch 2026"
When I add new learner "Rohit" to Department "NEET Batch 2026"
Then a LearnerContentAccess record is automatically created for Rohit
And Rohit can access "NEET Biology Mock Test 1" immediately
And no manual re-assignment is needed
```

AC-3.1.2 — Overlapping assignments — revoking one retains access

```
Given "NEET Physics Mock 1" assigned to: Department (Assignment A) AND Individual Priya (Assignment B)
When I remove Assignment A (Department)
Then Priya's access from Assignment B remains active
And Priya retains access to "NEET Physics Mock 1"
```

---

6. Individual Course Completion Certificate (V1)

Trigger

Certificate issued when learner completes a course (100% screens viewed).

Assessment completion certificates: V2.

Learning path certificates: V2.

Certificate Contents

- Learner name (denormalised)
- Course title (denormalised)
- Tenant name (denormalised)
- Completion date
- Certificate number: `KSS-{tenant_short}-{YYYYMMDD}-{seq}`
  - tenant_short = first 3 chars of tenant name uppercased (Akash → AKS, TechCorp → TCH)
  - seq = sequential integer within (tenant, date) scope, zero-padded to 3 digits

CA Visibility

CA sees all certificates in Reports → R6 Certificates Issued Log.

Learner-facing certificate download: V2.

Acceptance Criteria

AC-3.2.1 — Certificate issued on course completion

```
Given learner Priya is assigned course "HIPAA Compliance Training"
When Priya views 100% of course screens
Then a Certificate record is created:
    learner_name  = "Priya Sharma"
    content_title = "HIPAA Compliance Training"
    tenant_name   = "Akash Institute Delhi"
    certificate_number = "KSS-AKS-20260320-001"
    issued_at = NOW()
And CA can see this certificate in Reports → R6
```

---

7. Learning Paths — V2 (DEFERRED — DO NOT BUILD IN V1)

Learning Paths are entirely V2. This section is preserved for future reference.

V2 will include: Path CRUD (DRAFT/ACTIVE/ARCHIVED), sequential steps, pass threshold unlock engine, path enrollment, overdue flags, path completion certificates.

Tables NOT created in V1: learning_paths, learning_path_steps, learner_path_enrollments, learner_step_progress.

---

8. Audit Event Reference (V1)

Action	Trigger	Actor
CONTENT_ASSIGNED	ContentAssignment created	Client Admin
CONTENT_UNASSIGNED	ContentAssignment.removed_at set	Client Admin
LEARNER_CONTENT_ACCESS_GRANTED	LearnerContentAccess created (dynamic)	System
LEARNER_CONTENT_ACCESS_REVOKED	LearnerContentAccess revoked (dynamic)	System
CERTIFICATE_ISSUED	Certificate record created	System

LEARNING_PATH_*, LEARNER_ENROLLED_IN_PATH, etc.: V2.

---

9. Edge Cases (V1)

Edge Case	System Behaviour
Assign TENANT_PRIVATE content from another tenant	Blocked — not shown in catalog
Assign GLOBAL content not in any assigned B2B plan	Blocked — not shown in catalog
Learner moved to new dept mid-access	Access from previous dept assignment revoked; new dept assignments apply
Learner deactivated	LearnerContentAccess retained; learner cannot log in (V2: access freeze)

Course already completed — duplicate cert	Blocked — unique constraint on (learner_id, content_id) in certificates

---

End of PRD 3 — Content Assignment & Learning Paths v3.1 (Updated March 23, 2026)
Renamed: Catalog → Global Catalog | Platform Content badge → keySkillset Content badge
Learning Paths: V2 | Assessment certs: V2 | Learner download: V2
